

1. Ideation Phase: Brainstorming & Project Selection

Objective

The Ideation Phase focuses on identifying the business problem, understanding stakeholder needs, generating possible solutions, and selecting the most suitable solution for the Food Ordering Behavior Analysis project. This phase establishes the foundation for developing an interactive Tableau dashboard that supports data-driven decision-making.

A) Brainstorming - Idea Generation & Prioritization

Several project ideas were discussed before selecting the final project:

Idea	Description	Priority
Sales Performance Dashboard	Analyze sales and revenue trends	Medium
Hospital Management Dashboard	Analyze patient and hospital records	Low
Student Performance Dashboard	Analyze academic performance	Medium
Food Ordering Behavior Analysis	Analyze customer ordering, logistics & revenue	High (Selected)
E-Commerce Dashboard	Analyze online shopping behavior	Medium

Reason for Selecting the Project

- Food delivery platforms generate large amounts of customer data.
- Businesses require insights to improve operational efficiency.
- Tableau provides interactive dashboards for visualization.
- The project demonstrates Business Intelligence concepts.
- It has practical applications in decision-making.

Idea Prioritization Matrix

Criteria	Weight	Food Ordering Behavior Analysis
Business Value	High	Yes
Data Availability	High	Yes
Technical Feasibility	High	Yes
Visualization Potential	High	Yes
Learning Opportunity	High	Yes
